

# Chaitanya Bhardwaj

Full Stack Engineer

Phone: +91 8979676872

Email: chaitanyabhardwaj89@icloud.com

Address: Dehra Dun, Uttarakhand, India

## WORK EXPERIENCE

### Full Stack Engineer

*Cognizant, Bangalore (Jul 2021 - Current)*

- Developed REST APIs for a healthcare provider in North America; in-use by approx 60,000 users.
- Wrote, reviewed and delivered project, end-to-end on microservices for provider validation using SpringBoot.
- Automated several processes by developing a SpringBatch application which reduced manual effort by up to 97%.
- Developed a full stack web application using SpringBoot & Angular, for client's inventory management.
- Analysed and discussed system design of the application, and ensured best practises by following agile methodology.
- Identifying product requirements to software implementation, unit testing, configuring metrics, and dashboards.

### Full Stack Engineer

*Nlyze, Remote (Nov 2020 - Mar 2021)*

- Delivered a web app featuring analytical dashboard using Javascript and with the help of open-source libraries.
- Enabling real-time data visualisation and modification, resulting in a 75% reduction in report preparation time for data analytics team.
- Optimised CRUD operations by migrating to Firestore (NoSQL) from a relational database, to support high volume of data.
- Implemented cloud functions for user authentication. In-use by more than 20 businesses.

## SKILLS

- Backend: Java, Spring Framework, Microservices
- Frontend: HTML, CSS, Javascript, Angular
- Database: MySQL, PL/SQL
- Cloud and tools: Azure DevOps, Docker, Kubernetes, Kafka
- Architecture and system design: Object oriented programming, Design patterns, Data Structures & Algorithms

## TECHNICAL PROJECTS

### Blockchain Simulator

A program that mimics how a blockchain operates.

It showcases: Mining, SHA-256, Proof-Of-Work and consensus using Distributed P2P network.

### HTTP Web Server

Implementation of an HTTP web server, in Java. This application can host websites, static content, scripts, etc.

It showcases: Sockets, Multi-threading, parsing HTTP request and building HTTP response.

### OpenAI Data Structure Predictor

This app recommends suitable data structures applicable for any given situation. Built using OpenAI API.

It showcases: Generative AI based application (GenAI), APIs.

### TweetApp

A twitter clone, featuring posts and user authentication.

It showcases: Full stack development, SpringBoot, React, APIGateway, EurekaServer, SonarQube.

## RESEARCH & PUBLICATIONS

### Sports Image Classification

A framework for classifying sports images based on the environment and related surroundings.

Built on top of the Yolo darknet library which uses computer vision to detect objects. 1000x faster than R-CNN and 100x faster than Fast R-CNN.

It showcases: Inception V3 and Neural Networks
